

Running KidzQuest

Everything on the admin side, and the handful of jobs that come round each week.

You're the only person who can do any of this. Teachers and helpers see the check-in screen and nothing else, which keeps their Sunday simple and keeps the children's details in one pair of hands. Yours.

There are four screens down the left. **Dashboard** for how things are going, **Kids** for the children, and **Teachers** and **Assistants** for who's helping where.

THE WEEKLY RHYTHM

WHEN	WHAT
Once, at the start	Make an account for each teacher and helper
Each week	Put people in rooms for Sunday
Each week	Add any children you know are coming
When you have time	Work through children with nobody to collect them
Every August	Move everyone up a group

GIVING PEOPLE ACCESS

1 Make an account

Go to `/admin` , then **Users** , then **Create New** .

You'll need their name, their email, and a temporary password to send them. Then pick their role on the right hand side.

Administrator	Everything. You, and anyone standing in for you.
Teacher	Check-in screen, and can approve a new person collecting.
Teaching assistant	Check-in screen for their own room.

/admin · Users · Create New

Name

Email

Password

Role

Teaching assistant ▾

1

1 is the part people forget

Do give everyone a role. Without one they can sign in but every screen will be empty, which looks like the app is broken.

Ask them to change the password the first time they sign in.

Assistants

3 not in a room this Sunday

NAME	ROOM	SUNDAYS
Minh Pham	Exp Voy Trail	14
Sarah Lim	Exp Voy Trail	9
Tuan Do	Exp Voy Trail	17

1

1 tap a chip to put someone in that room

2 Put people in rooms

Open **Teachers** or **Assistants** and tap the room chips.

Four little buttons next to each person, one per group. Tap to put them in, tap again to take them out.

This is the one that stops Sunday working if it's missed. Without a room, a helper signs in and every room tells them it isn't theirs.

A yellow line at the top tells you how many people still have nowhere to go.

The little green squares show the last eight Sundays each person served. Handy for spotting someone who's quietly stopped coming, or someone doing rather too much.

THE CHILDREN

3 Editing anything

Open **Kids** and type straight into any box.

Changes save when you click away. There's no Save button and nothing to submit.

- 1 The buttons along the top are shortcuts to the children who need something
- 2 Type a school grade and the group sorts itself out
- 3 The little arrow opens the adults for that child

Press **Escape** while you're still in a box to undo. Once you click away it's saved, though every change is kept with your name on it, so nothing is ever really lost.

Kids			
On the register 1 No collector 26 No grade 107			
FIRST	GRADE	GROUP	PICK-UP
▶ Abigail	2	Voyagers v	1 ok
▶ Adam	—	Voyagers v	1 ok
3 Angela	1	Voyagers v	nobody

Everything is editable in place

Kids · one row		
CHILD	1 GRADE	GROUP
Alma Tumwine	3	Trailblazers
Typing 3 moved her from Voyagers to Trailblazers		

1 type here, the group follows

4 Grades do the sorting

Type a grade and the child moves into the right group on their own.

Explorers	Grade 0, pre-school
Voyagers	Grades 1 and 2
Trailblazers	Grades 3 and 4
Pathfinders	Grades 5, 6 and 7

It also clears the little ? that means nobody has confirmed where that child belongs.

You can always pick a group by hand instead, if a child is better off with a sibling or a different year. A small pin appears next to them, and August leaves them where they are.

107 children have no grade yet. They came across from the spreadsheets, which never recorded one. Every grade you fill in is one less to sort out next August.

5 Who can collect a child

Tap the arrow at the start of a row.

Each adult has a **May pick up** tick box. Being a contact and being allowed to take a child home are two separate things, so a grandmother can be reachable without being on the list at the door.

+ **Add an adult** for anyone new. If their phone or email is already on another child, they'll be joined up rather than duplicated.

☒ May pick up

+ Add an adult

1 this tick is what the door checks

6 Adding a child before Sunday

+ **Add a child** , top right of the Kids page.

Worth doing for any family you know is coming. A child added on a Tuesday gets their details typed properly. The same child arriving at the door on Sunday gets twenty seconds and a helper with a queue behind them.

Explorers is empty at the moment. All 31 of last year's moved up to Voyagers in August and nobody has come in behind them. Anyone new joining pre-school needs adding here, or their first Sunday will be a door registration.

7 When a child stops coming

Tap **Archive** at the end of their row.

You'll be asked which of these it is, and the difference matters more than it looks:

Left Hanoi	Family moved away. Nothing to follow up.
Stopped attending	Still in town. This is the one worth a phone call.
Moved to Aftershock	Grown out of KidzQuest. Not a loss.
Duplicate	Same child twice. Keep the other one.

Nothing is deleted. Their attendance stays, and **Restore** brings them back into the group they were in if the family reappears.

Teachers and helpers can archive too, since they're usually the first to know a family has moved. You'll see it on the **Left** tab.

Take a child off the register

☐ Left Hanoi
Family moved away

☒ Stopped attending
Still in town. Worth a call.

☐ Moved to Aftershock

1 the one that needs following up

26 children have nobody who can collect them

Roughly one in five

These came across from the spreadsheets with a first name and nothing else. No parent, no phone number. Several of them have been attending all term.

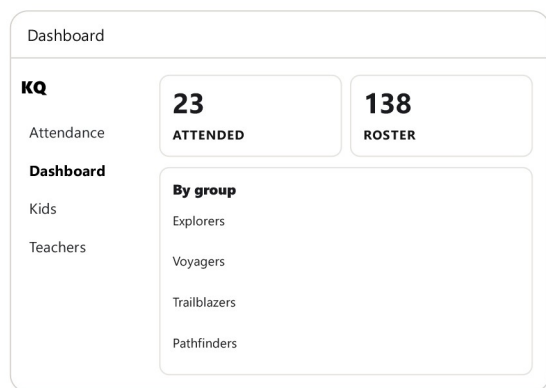

On a Sunday, each one needs a teacher to approve their going home. Twenty-six of those in one morning and everyone stops treating it as unusual, which is the one thing that would take the value out of the whole system.

It's phone calls, not computer work. Open **Kids**, tap **No collector**, and you have your list. A volunteer with a phone could clear most of it in an hour.

For each one: expand the row, + **Add an adult**, name and number, tick **May pick up**. Done.

Two phone numbers came across broken and can't be repaired, because a digit is wrong and there's no way to tell which. **Prince Lanaban** and **Sophia Patterson** both need asking again.

THE DASHBOARD

Colours match the groups

Four numbers at the top, then attendance by group, recent Sundays, and a **Needs a look** list at the bottom.

The **Roster** column on recent Sundays is how many children were on the register *that week*, not today. So a Sunday in May shows May's numbers even though children have joined since.

Something not seen for a few weeks isn't always a problem. Families travel, especially over Tet and the summer. The list is there to prompt a thought, not to make anyone chase.

EVERY AUGUST

KidzQuest moves everyone up on the **first Sunday of August**. Not everyone moves room, which is why the grades matter. Voyagers holds grades 1 and 2, so only the grade 2s go up to Trailblazers and the grade 1s stay where they are.

Grade 7s finish KidzQuest and go to Aftershock. Nobody is moved there automatically, because that's a conversation with a family rather than something the app should decide.

This one needs the person who looks after the website. It isn't a button yet. Give them a few weeks' notice before August rather than the week before.

IF SOMETHING BREAKS ON A SUNDAY

Everything lives in the database, and that can be read even if every tablet in the building has died. This answers "who is still in the rooms right now":

```
select c.first_name, c.last_name, a.status,  
       a.checked_in_at, a.checked_out_at  
from kq.attendance a  
join kq.children c on c.id = a.child_id  
join kq.sessions s on s.id = a.session_id  
where s.service_date = current_date;
```

Worth having open in a tab on a Sunday morning. If you'd rather not touch it, whoever looks after the website can run it in a moment.

Somebody can't sign in

Check they have a role on their account. That's nearly always what it is.

A helper says every room is closed to them

They haven't been put in a room. Teachers or Assistants, tap the chip, done.

Somebody wants a change undone

Every edit is kept with a note of who made it and when. Ask whoever looks after the website and they can find the old value.

The three that matter

Everyone needs a role, or nothing works

Everyone needs a room, every week

26 children still need someone who can collect them
